

2010 Embraer Legacy 650

G-RBNS Only 472 Hours Total Time

For Sale

London Executive Aviation
Private Aircraft charter, sales and management

Relax and work in comfort with up to 13 passengers in our stand up cabin. Stay in contact by using the worldwide capable satellite phone or by using the wireless high speed internet in flight from anywhere on the globe. Eat a gourmet meal prepared in the galley, and relax by watching your favourite movie on one of two DVD players that play simultaneously in separate cabin sections.

Remove yourself from the rest of the cabin in the aft room. Here, catch up some sleep on the three place divan that converts into a bed, or watch your own movie while the rest of the cabin watches theirs. No need to worry about people using the lavatory – this is one of the few Legacy 650s that has a lavatory in the forward and aft cabins, allowing you to sleep in peace while letting others enjoy the flight.

Carry on your business meetings in flight, or enjoy dining with associates and loved ones at the four place conference/dining group. When finished working and eating, the group converts into a two place sleeping area, allowing you and your passengers to recharge before arrival.

The Four chair club seating arrangement in the forward cabin gives your passengers a comfortable and spacious way to engage in relaxed conversation. Versus other aircraft, the Legacy 650 has a much larger cabin area, meaning your passengers have the luxury of their own personal space while seated. Importantly, these seats lie flat, offering further sleeping areas for two more people.

Each seat pair has their own fold out tables, giving each passenger a surface from which to work and eat throughout the flight.

The mid cabin credenza gives ample storage room for work supplies, entertainment consoles, blankets and other necessary cabin items, making sure your baggage room is saved and used for just that – your baggage. The Legacy 650 boasts a baggage hold that is twice as large as competitors, letting your passengers carry multiple bags without worrying if they will fit in the plane.

Information about the Legacy 650:

Range

3,900 nautical miles with 4 passengers, 3,700 nautical miles with 8 passengers. This makes Dubai – London and London – New York a regular non-stop flight.

Operating Costs

Built with some of the best operating economics in the private aircraft industry, the Legacy 650 offers a further improvement over the already economic Legacy 600. The 600 has long been a favorite of charter operators throughout Europe due to its low operating costs, and the Legacy 650 offers even greater fuel efficiency and mechanical savings. When compared to the competing G450, the Legacy 650 offers double digit percentage efficiencies, saving you over a thousand dollars per hour. The Legacy 650 lets you travel in style and with the knowledge that you chose a smarter plane than your competitors.

Performance

Cruise over the weather at 41,000 feet, while travelling at over 500 miles per hour. Importantly, the Legacy 650 allows you to land with large amounts of fuel, meaning you can fill up at your home airport and avoid higher fuel costs from foreign airports.

Reliability

Boosting a fleet dispatch reliability of 99.95%, you can count on your aircraft being ready to leave whenever, and wherever, you are.

Technical Data

Options

Wireless High Speed Data System – enables you to connect to the internet at high data transfer rates using the wireless connection in your computer

Forward Crew Lavatory – an additional lavatory is located on the Left Hand side of the galley, including external servicing capabilities. This prevents the crew from disturbing the cabin during long flights.

Recessed Floor – The Recessed floor gives an additional amount of headroom, to allow for more comfortable flights for the taller passengers.

Iridium Satcom ST-3100 system – dual channel satellite telecommunication provided via the Iridium satellite network.

Airshow 4000 Multi media package – gives latest in flight position information, along with updates of time remaining, cruise speeds and moving map functions

Galley Options include a Microwave Oven, Coffee Brewer, Refrigerator

Flight Attendant Jumpseat with intercom handset

Upgraded Monitors – the monitors for DVD and Airshow displays have been upgraded from the 15 inch screens to the 17 inch screens. They are located in the forward Left forward and right aft bulkheads.

Additional VIP control panel

Plus assorted other options

Total amount for the installed options – approximately \$1.2 million USD
